DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

Miyashita et al (5,558,015) teach a hot press, comprising a tubular ring, a first and second mold bolster, or carrier unit, each carrying a molding chamber made of a thin and flexible and filled with a fluid medium for heating and transferring an uniform pressure onto a substrate of the molding material, and a driving unit for moving the mold bolster.

However, Miyashita fails to disclose a housing having a flange extending in a first direction from a periphery of the opening, and a second flange from the mold carrying unit extending in a second direction opposite to the first flange to form surface contact between the first flange and the second flange. So that during the molding process, the second flange is separated from the first flange, and the mold is uniformly pressed by the fluid pressing unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thu Khanh T. Nguyen whose telephone number is 571-272-1136. The examiner can normally be reached on Monday- Friday, 6:30-4:00.
